

Mary Jean Blink

Mary Jean brings considerable experience to S2A Solutions as a leader in software, data mining and artificial intelligence. She is Chief Operating Officer of TutorGen, a Carnegie Mellon University education technology startup founded by Dr. John Stamper.

She has extensive experience designing, developing, and managing software development for custom applications and commercially marketed products. She was also a computer audit manager for one of the Big 4 accounting firms while living in the Silicon Valley.

She has led development and technology teams in highly regulated industries. And, she maintains her affiliation with Mount St. Joseph University in Cincinnati as an adjunct professor after ten years as faculty at the Mount, the last three serving as Chair of the Computer Information Systems Department.

At TutorGen, she has been the Principal Investigator for NSF-funded and Air Force AFWERX SBIR grants and has published several peer-reviewed papers on educational data mining and AI in education.

Mary Jean earned a B.S. in Computer Science from the University of Dayton and an MBA from the University of Cincinnati.
